Overview

Starmount’s Marquis Digital Media Suite is an easy-to-use, cross-platform software suite to assemble, schedule, playback, and monitor digital media. Marquis features a simple user interface to create content, manage assets, develop playlists, schedule playback, and play digital media on any size screen across your network. It provides all the tools needed to organize and manage promotional, informational, and advertising content for display on monitors, kiosks, and a variety of digital media devices.

Starmount's advanced technology delivers unrivaled flexibility for production and distribution of relevant content.

Benefits

- Intuitive user access management
- Flexible display options
- Easy scheduling and deployment
- Simple network configuration
- Powerful content assembly
- Improve effectiveness of promotions

Starmount Marquis™ Digital Signage

Starmount's products are differentiated by their ease of use, platform independence, ability to tightly integrate with in-store systems, and the ability to adapt to your evolving business needs. Marquis is delivered in a web-based application that can be deployed at an enterprise or in-store level to deliver dynamic digital signage.

Manage When, Where, & How Your Content is Delivered.
Marquis' scheduling engine is highly configurable to manage when, where, and how digital content is distributed. Marquis allows you to define and configure media run schedule and sequence, by date, time and day of week.

Take Advantage of Advanced Monitoring & Reports.
Marquis provides monitoring, reporting, and a view of playlist schedules. Configuration features allow the user to easily define the playback platform and configure content for play inside all Starmount applications and many generally available media playback devices. Integration components and additional scripting tools provide more power and access to, databases, services, and devices as contributors to the whole digital message program.

Starmount Marquis Media Player

The Marquis Media Player is a content presentation application that can be installed on a variety of devices, for example digital monitors, kiosk, PC, or other digital environments. The Media Player can play text, graphics and a variety of picture and video formats, 24 hours a day, 7 days a week. Users can dynamically update schedule run in real-time, play results, and view event statistics, with playback device details captured for detailed analysis.
About Starmount

Starmount is a leading provider of connected commerce solutions, from software for digital signage, interactive kiosks, and mobile devices to integration and implementation of point-of-service applications. Starmount works with a diverse client base including customers from the retail, quick serve restaurant, hospitality, and gaming industries.

Starmount has extensive experience implementing and innovating point-of-sale solutions for the retail industry, specifically Oracle® Retail applications. Starmount provides quality integrated products and services, enabling our customers to realize value from their solutions.

NEW! Innovating with Mobile Point-of-Sale
Starmount is working closely with global retailer, Urban Outfitters, to develop and implement a new mobile point-of-sale (POS) application based on the Apple® iPod touch platform. With tight integration with Oracle Retail POS, Starmount is delivering an easy-to-use application to improve personalized customer service, increase floor efficiency, and reduce transaction time and costs.

Technology Services that Deliver Results
Starmount offers a complete range of implementation services, an extensive library of software components and modules, and integration tools that speed time-to-market and reduce overall development costs.

We Support You from Start to Finish
Starmount is positioned to provide expertise and resources to customers for the entire software life-cycle. Starmount employs a proven software development process to ensure that customer requirements are met and well designed. This process involves the customer from the first-phase to the end ensuring that the software delivered is exactly what the customer desires.

Starmount offers expertise in the following areas:

- **Project Management** - Our highly experienced consultants have worked together on projects for many years with a 100% success rate.
- **Software Development** - Our team has the software development experience to meet and exceed your expectations.
- **Systems Integration** - Integrated systems help create and support innovative new business models.
- **Systems Testing and Verification** - We offer a full range of testing and verification services to ensure your project is a success.
- **Systems Rollout and Deployment** - Success from start to finish, our strategy reduces costs, and utilizes best-practice deployment models.
- **Customer Support** - No-nonsense, efficient, attentive technical support for your business needs.
